DIVISION OF SCIENCE RESOURCES STUDIES

The Division of Science Resources Studies (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

> *provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...*

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

SRS data are available through the World Wide Web (http://www.nsf.gov/sbe/srs/stats.htm). For more information about obtaining reports, contact paperpubs@nsf.gov or call (301) 947-2722. For NSF's Telephonic Device for the Deaf, dial (703) 306-0090.

ACKNOWLEDGMENTS

This publication was prepared by Dr. Maria C. Papadakis of Virginia Polytechnic Institute and State University under contract with SRI International for the National Science Foundation's Division of Science Resources Studies (SRS). Overall direction and guidance was provided by Dr. Eileen L. Collins, Project Director, SRS; Ms. Catherine P. Ailes, Director, Science and Technology Policy Program, SRI International; Dr. Mary J. Frase, Deputy Division Director, SRS; and Dr. Lynda T. Carlson, Division Director, SRS. Mr. Ronald L. Meeks, Senior Analyst, SRS, oversaw technical review. Dr. Frase contributed comprehensive statistical and narrative review. Mr. Ronald S. Fecso, Chief Statistician, SRS, supplied thoughtful and thorough statistical review.

Valuable contributions and insights came from Mr. Nils Newman, Mr. Robert K. Carr, and Ms. Lori Thurgood, all of SRI International. Thanks are due Dr. William S. Bainbridge, Dr. Rachelle D. Hollander, and Dr. C. Suzanne Iacono—all in NSF—for technical insight and review of the draft report. Several reviewers also supplied important feedback on the draft manuscript from outside NSF, and their suggestions strengthened it considerably. These individuals include Dr. Eileen Appelbaum, Economic Policy Institute; Dr. Robert Kraut, Carnegie Mellon University; Dr. Frank Stafford, University of Michigan; and Dr. Alladi Venkatesh, University of California—Irvine.

Ms. Nita Congress performed the technical editing of the manuscript. Ms. Anne M. Houghton, Ms. Julia H. Harriston, and Ms. Tanya R. Gore of the Information Services Group of SRS undertook copyediting, processing, and final composition of the report. Mr. John R. Gawalt, Director of the Information Services Group, and his Web team handled electronic publication.

Funding was provided by SRS; the Computation and Social Systems Program in the Division of Information and Intelligent Systems; and the Sociology Program, the Science and Technology Studies Program, and the Societal Dimensions of Engineering, Science, and Technology Program in the Division of Social and Economic Sciences—all in NSF.
